$CAMH "Downtown West" formely Archway Clinic, formerly for "intensives" (their word!) formerly for schizophrenia, now still mainly for schizophrenia but characterized (stigmatized?) as "complex mental illness" - the words keep changing but the labelling only gets worse. What is schizophrenia now "characterized" as - classed with?
COMPLEX MENTAL ILLNESS: "clients whose serious mental illness has brought them in contact with the law" (from a $CAMH blog).
I knew and still know many people labelled with schizophrenia whose poverty and homelessness "brought them in contact with the law."
So now we are stigmatized and criminalized too. Bully for you $CAMH. But when you call yourselves "END STIGMA" do you seriously expect to be greeted with anything but guffaws of derisive laughter? What, seriously, do you think you deserve? The ORDER OF CANADA?!

DEBASED! Because $CAMH
BOUGHT two of these with
A PACK of LIES!
